Work Experience

The Tunisian Post | Full Stack Web Developer Intern

Tunis, Tunisia | 02.2023 - 06.2023

- Oversaw the development of a Full Stack **MERN** stamps e-commerce with ChatBot integration, implementing user authentication with **MongoDB** including **JSONWebToken** middleware, enforcing **Cloudinary** for image upload, and merging **Stripe** for subscription management and payment transactions.
- Assembled a responsive UI using **ReactJS**, **MaterialUI**, and **Styled-components**, applied **Redux** for state management, developed an admin dashboard to control user activities, product management, and order processing, and conducted **Git** for version control.

The Tunisian Post | Software Developer Intern

Tunis, Tunisia | 01.2023 - 02.2023

- Led the creation of a Post Office admin dashboard using the **MERN** Stack featuring **Redux Toolkit Query**.
- Designed and implemented responsive, user-friendly UI using **ReactJS**, **MaterialUI**, and **Nivo**.
- Applied **Git** for version control, and executed the application deployment on **Render**.

TIS Circuits | Junior Developer Intern

ZI, Ben Arous, Tunisia | 02.2022

- Guided the inception of a recruitment web app with a basic UI using **ASP.NET MVC**, **JQuery**, and **Bootstrap**.
- Developed backend functionalities, leveraging **C#** and **SQL Server**, to support the application's core features.

Afrochim | Initiation Student Intern

Megrine, Ben Arous, Tunisia | 06.2021

- Gained valuable insights into professional work environments and knowledge in industrial products business.

Education

Higher Institute of Technological Studies

Ben Arous, Rades, Tunisia | 09.2020 - 06.2023

- Bachelor of Information Technology specializing in Information Systems Development

Project Experience

Socialize real-time chat application with Pusher

- Directed development of a Chat App utilizing **Typescript**, and admitting **Pusher** for real-time communication.
- Utilized **Prisma** with **MongoDB** for streamlined database operations, integrated user authentication featuring Google and GitHub integration using **NextAuth**, and incorporated file-sharing capabilities with **Cloudinary**.
- Designed and implemented sleek responsive UI using **React** and **NextJS**, **TailwindCSS**
- Applied **Git** for version control and executed the application deployment on the **Vercel** platform.

Full Stack Spotify clone with NextJS

- Initiated the creation of a Spotify Clone employing **Stripe** for premium subscription payments
- Conducted **Supabase** for database management, storage, and authentication featuring GitHub integration.
- Crafted a fully responsive UI using **React**, **NextJS**, and **TailwindCSS**, and employed **Git** for version control.
- Concluded the development lifecycle with the deployment of the application on **Vercel**.
